

Don't get scrambled!

Unscramble the words and connect them with the correct part of the body with a line.

reliv

1.) It's not pretty! Alcohol can cause fat to build up in this organ, which then becomes scar tissue, which can lead to disease and eventually death.

selg

2.) Let's set the record straight. Alcohol can make these go crooked. They can wobble and bobble and cause you to fall. That's not a trip you want to take.

areth

3.) Alcohol doesn't have any love for this organ. It can cause stress, high blood pressure, stroke and even death.

lalms tessentini

4.) Try digesting this. Alcohol can produce excess acid, which can damage the protective lining in this organ. Gross!

nuslg

5.) Large quantities of alcohol can make it difficult for this organ to do its job. It can literally take your breath away.

riban

6.) Think about it. Alcohol can affect this organ by causing memory problems, damage, and even reduction in size. You're smarter than that.

esye

7.) Are you a good pupil? Alcohol can make these red and blur the way you see things. That can be very dangerous.

Answers: 1.) liver 2.) legs 3.) heart 4.) small intestines 5.) lungs 6.) brain 7.) eyes

Say "yes" to a healthy lifestyle and "NO" to alcohol because it can change your body, change the way you think, even change your personality. Visit ASKLISTENLEARN.COM for games, activities, and more information.
